3. INTRODUCTION

Background to the Problem

In Bangladesh, freelancing has become really popular due to its flexibility and remote work opportunities. However, freelancers face several challenges:

- **Tough Competition:** More people are freelancing, making it hard to find jobs.
- **Skills Gap:** Freelancers might not have the right skills that clients need.
- **Finding Jobs:** It's not easy for freelancers to find good projects.
- **Trust Issues:** Freelancers and clients might not trust each other.
- **Payment Problems:** Getting paid on time can be tricky, especially internationally.
- **No Support:** Freelancers lack training and career growth help.
- **Isolation:** Working alone can be lonely, affecting work-life balance.
- **Not Updated:** Freelancers need to know about industry trends.

Solving these issues is important for freelancers to thrive in Bangladesh's freelancing industry.

Solution to the Problem

solution to the freelancing problem is the web app "Upwork." This platform connects freelancers and clients worldwide for various projects. Here's how it helps:

1. **Matching Jobs:** Freelancers create profiles with skills, and Upwork matches them with suitable projects from clients.
2. **Global Opportunities:** Freelancers can work for clients from anywhere, expanding job options.
3. **Secure Payments:** Upwork ensures safe payments and builds trust between freelancers and clients.
4. **Skills Proof:** Freelancers showcase past work and skills tests, showing they're qualified.
5. **Remote Work:** Upwork supports remote work, fitting modern work preferences.
6. **Project Management:** Tools help freelancers and clients collaborate smoothly.
7. **Job Variety:** Upwork covers many job types, offering diverse opportunities.
8. **Learning:** Freelancers learn from different projects, even though direct training isn't provided.

Upwork's easy-to-use platform offers a simple solution for freelancers to find work and clients to find skilled freelancers.

4. REQUIREMENT SPECIFICATION

4.1 System Features

❖ There are two types of users in our system, The users are -

- Freelancer
- Client

❖ Common Feature -

1. Sign In

Functional requirements

- 1.1 The software shall allow users to login with their given username or mobile number and password
- 1.2 The software shall provide the verification code during sign in [only for specific accounts]

Priority Level: High

Precondition: user should have valid Upwork account with verified user Gmail and password

2. Create Account

Functional requirements

- 2.1 The software shall make sure to run proper form validation during registration.
- 2.2 The software shall provide the verification message in Gmail box during Sign Up

Priority Level: High

Precondition: N/A

3. Forgot User Password

Functional Requirements

- 3.1 The software shall allow users to recover password
- 3.3 User password can only be recovered through email
- 3.4 User needs to verify the mail before recovery

Priority Level: High

Precondition: user should have valid Upwork account with verified user Gmail and password

4. Search Job list by selecting category
 - 4.1 Select job type
 - 4.2 Select job location.
 - 4.3 Search and find job related to selected category.

Priority Level: High

Precondition: N/A

5. View job details
 - 5.1 Show Job title, location, deadline, experience, posted date & job type.
 - 5.2 Company overview, job description, job responsibility, job requirements.
 - 5.3 Employee able to apply the job if he/she logged in & show related job according to the category.
 - 5.4 Show error message for multiple apply in the same job

Priority Level: High

Precondition: N/A

6. Freelancer profile page overview
 - 6.1 Show last login time, date with.
 - 6.2 Show user image.
 - 6.3 Show features as a sidebar.

Priority Level: High

Precondition: Login in the website

7. Update Freelancer profile details
 - 7.1 Updateable: First name, Last name, Email, phone no, Education, Gender, street zip code, country.
 - 7.2 User image, Details about user.
 - 7.3 Update to change data.

Priority Level: High

Precondition: Login as Freelancer

Precondition: Login as Employee

8. Adding Freelancer Professional Qualification
 - 8.1 Add multiple qualification.
 - 8.2 Provide Country, Institute name, Time frame, Name of degree, Certificate.

Priority Level: High

Precondition: Login as Freelancer

9. Adding Freelancer Language Proficiency

- 9.1 Add multiple language.
- 9.2 Provide Language name.
- 9.3 Select Speaking level (Fair, Good, Very good).
- 9.4 Select Reading level (Fair, Good, Very good).
- 9.5 Select Writing level (Fair, Good, Very good)

Priority Level: High

10. Adding Freelancer academic qualifications

- 10.1 Add multiple qualifications.
- 10.2 Provide Education level, Institute name, Course name, time frame.
- 10.3 Select Country, attach certificate and transcript

Priority Level: High

Precondition: Login as Freelancer

11. Adding Freelancer working experience

- 11.1 Add multiple experience.
- 11.2 Provide Institution name, supervisor name, supervisor telephone, job title, starting & ending date, duties and responsibilities

Priority Level: High

Precondition: Login as Freelancer

12. Adding Freelancer other attachment

- 12.1 Add multiple attachment.
- 12.2 Provide attachment type, Issuer, attachment image

Priority Level: Medium

Precondition: Login as Freelancer

13. Show Freelancer applied jobs

- 13.1 View applied jobs.
- 13.2 View job title, location, company name, applied date, job type

Priority Level: High

Precondition: Login as Freelancer

14. User Logout

- 14.1 Logout to redirect homepage.

Priority Level: High

Precondition: Login as Freelancer

15. Update Client profile details

- 15.1 Updateable: Company name, established in, type, website, select people, city/town, country, zip code, street, phone no. company background, services, expertise.
- 15.2 Update company logo.
- 15.3 Update to change data.

Priority Level: High

Precondition: Login as Client

16. Company overview

- 16.1 Show company name, logo, established year, type, website, background, services, expertise.
- 16.2 Offered job from that company with job name, category, logo, type, location, required years of experience, deadline & details button

Priority Level: High

Precondition: Login as Client

17. Post a job (Only Client can post)

- 17.1 Provide job title, city, closing date, job description, job responsibilities, requirements.
- 17.2 Select country, job category, job type, experience.

Priority Level: High

Precondition: Login as Client

18. View Posted job

- 18.1 Posted job showing sequentially with company logo, title, category, type, location, city, deadline.
- 18.2 Employer able to modify and delete the post.
- 18.3 Also, able to view the applicant's proposal, for that job, who applied to that job.

Priority Level: High

Precondition: Login as Client

19. Contact us

- 19.1 Show address, email, phone and some social link (Facebook, twitter, Instagram)
- 19.2 Provide your name. email and message.
- 19.3 Get in touch to reach administration.

Priority Level: High

Precondition: N/A

20. Client profile overview

20.1 Display image, name, degree & email.

20.2 About employee

20.3 Education, working experience, training and workshop, professional qualifications, other attachments, language proficiency & referees.

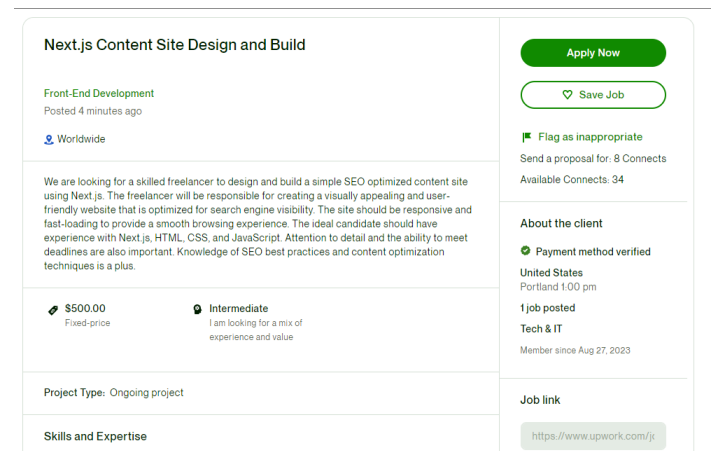

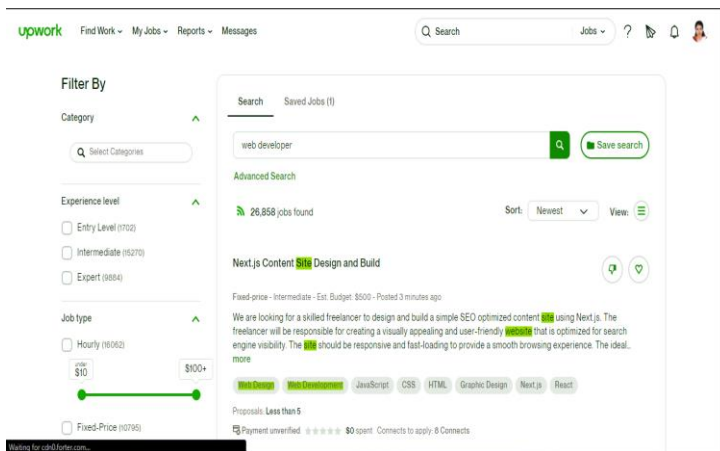

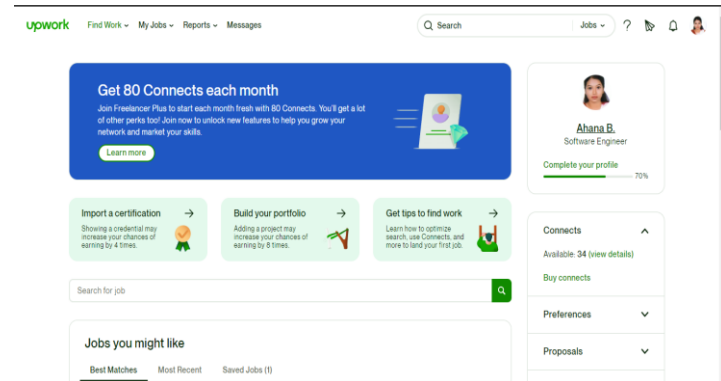

Priority Level: High

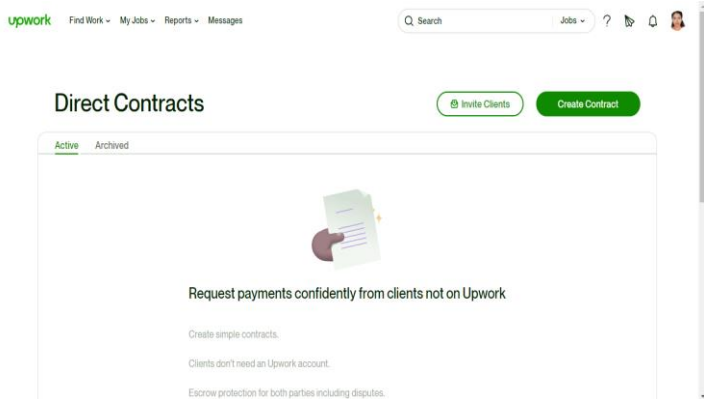

Precondition: Login as Client

4.2 System Quality Attributes

- **Performance:** Performance criteria specify how quickly or how successfully a system must carry out particular functionalities. throughput, capacity, and timeliness. It also discusses how a situation with too much traffic can affect the system's operation (when more users are trying to use it at a time).
- **Efficiency:** This characteristic specified how to use the system effectively. It deals with the hardware requirements for carrying out the various system operations. It consists of its processing power, storage capacity, and data transmission ability (Local server to Central Server).
- **Usability:** The ease of usage can be used to gauge this. The software should be simple to use. Usability refers to how simple it is for the system's initial user, a student, to utilize and obtain services. This is required while users will use it at danger time.
- **Integrity:** Integrity, this element has to do with the integrity of the other system, for example, how easily it can cope up in mobile phone as well as computer.
- **Reliability:** How the system is reliable while using it. Whether it remains all day in maintenance or is it can provide its service without crashing most of the time.
- **Testability:** If the system encounters a bug or error, it must be able to test for that bug or error.
- **Security:** It prevents unauthorized access of random people so that the system data cannot be at risk. Only registered users can use the data.

4.3 System Interface

5. FEATURES NOT TO BE TESTED

The following is a list of the areas that will not be specifically addressed.

- Repeated CRUD operation for the reference, professional qualities, CV & more functionalities.
- Maintenance of the system
- Network facilities

6. TESTING APPROACH

6.1 Testing Levels

The testing process for Upwork will primarily involve SYSTEM testing. Due to the unavailability of the source code, UNIT and INTEGRATION testing are not feasible. Moreover, due to time limitations, it's not possible to gather users for ACCEPTANCE testing. Hence, a specialized team of testers will exclusively conduct SYSTEM testing.

The dedicated testing team will meticulously carry out SYSTEM testing to identify any defects in the external system interface prior to the product's release. Automated testing tools will play a role in executing these tests. The team will initiate a collaborative session to outline the comprehensive testing strategy, allocate test cases, execute the tests, and subsequently document the outcomes.

6.2 Test Tools

Selenium IDE: This browser extension primarily facilitates the recording and execution of test cases. It finds common use among test case developers. Its user-friendly interface streamlines the process of running test cases, supports the reuse of these cases, and aids in conducting control flow tests. This tool is predominantly utilized for automation testing purposes.

6.3 Meetings

The meetings were conducted for 3 days. The summary of the each of the meetings are given below:

- ❖ Meeting 1 (20th August 2023): Requirements were gathered from the website. Some of the features were tried out and noted down.
- ❖ Meeting 2 (23rd Wednesday 2023): Test case for the features were devised and distributed among the esters of the team. Test cases were run by each of the members of the testing team individually and the results were reported.
- ❖ Meeting 3 (26th August 2023): Final test cases were run the results were reported. Final meeting was taken to discuss the findings of the test cases which were summarized and test case report was drafted.

7. TEST CASES/TEST ITEMS

1. Sign-up as a Freelancer –

Project Name: Upwork		Test Designed by: Ahana Bhuiyan		
Test Case ID: UPW_TC-01		Test Designed date: 24/08/2023		
Test Priority (Low, Medium, High): high		Test Executed by: Ahana Bhuiyan		
Module Name: Freelancer Signup		Test Execution date: 24/08/2023		
Test Title: Freelancer Registration Process				
Description: This test case verifies the functionality of the freelancer signup process on the Upwork platform. It ensures that new users can successfully create their freelancer accounts by providing accurate information and following the necessary steps.				
Precondition (If any): <ul style="list-style-type: none">Internet connectivity is available.The Upwork website is accessible.				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)
1. Browse to the Upwork website. 2. Click on the "Sign Up" button. 3. Select the "Apply as a freelancer" option. 4. Select region, then agree with terms & condition. 5. Click the create my account. 6. Then click verify with your email.	First Name: Ahana Last Name: Bhuiyan Email Address: bhuiyanahana@gmail.com Password: trapa#234 Region: Bangladesh	The system should display a confirmation message and redirect the user Gmail to verify & show user profile upon successful submission.	As expected,	Pass
Post Condition: User's freelancer profile should be created, and they should be able to access their Upwork dashboard.				

2. Login as a Freelancer –

Project Name: Upwork			Test Designed by: Ahana Bhuiyan	
Test Case ID: UPW_TC-02			Test Designed date: 24/08/2023	
Test Priority (Low, Medium, High): high			Test Executed by: Ahana Bhuiyan	
Module Name: Freelancer Login Process			Test Execution date: 24/08/2023	
Test Title: Verify Freelancer Login Process				
Description: This test case aims to verify the successful login process for freelancers on the Upwork platform. It ensures that registered freelancers can access their accounts by providing correct login credentials.				
Precondition (If any): <ul style="list-style-type: none">The user must have a registered Upwork freelancer account.				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)
1. Go to Upwork website. 2. Click "Log In" option 3. Enter Email Address. 4. Enter Password. 5. Click "Log In" button.	Email Address: bhuiyanahana@gmail.com Password: trapa#234	The system should authenticate the user's credentials and redirect them to their freelancer dashboard upon successful login.	As expected,	Pass
Post Condition: N/A

Project Name: Upwork		Test Designed by: Md Aminul Islam		
Test Case ID: UPW_TC-16		Test Designed date: 24/08/2023		
Test Priority (Low, Medium, High): Medium		Test Executed by: Md Aminul Islam		
Module Name: Add category		Test Execution date: 24/08/2023		
Test Title: Add category				
Description: Test the website feature add category.				
Precondition (If any): Login as User				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)
1. Go to the homepage 2. Click on Login 3. Choose add category 4. Select a category 5. Click Submit	Add Category: QA testing	Show a message Training or workshop have been added successfully	As expected,	Pass
Post Condition: user is validated with database and search appropriate job title.				

The screenshot displays the Selenium IDE interface for a project named 'Upwork Testing *'. The test case 'Add category*' is currently executing. The command log shows the following steps:

- 6. mouseOver on css=.mb-20 path OK (21:56:54)
- 7. mouseOut on css=.mb-20 path OK (21:57:00)
- 8. runScript on window.scrollTo(0,600) OK (21:57:00)
- 9. click on css=#cardCollapseButton-531770282580668418 polygon OK (21:57:00)
- 10. click on css=#cardCollapse-531770282580668418 .col-md-6:nth-child(8) .up-checkbo x-replacement-helper OK (21:57:01)
- 11. click on xpath=//div/div/div[3]/div/button[2] OK (21:57:01)

The test case status is 'Add category* completed successfully' at 21:57:01. The interface also shows a command palette with fields for Command, Target, Value, and Description.

17. Update profile visibility

Project Name: Upwork		Test Designed by: Md Aminul Islam		
Test Case ID: UPW_TC-17		Test Designed date: 24/08/2023		
Test Priority (Low, Medium, High): High		Test Executed by: Md Aminul Islam		
Module Name: Update Profile visibility		Test Execution date: 24/08/2023		
Test Title: Update Profile visibility				
Description: Test the website feature of Update Profile visibility.				
Precondition (If any): Login as User				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/ Fail)
1. Go to the homepage 2. Click on Login 3. Choose Update profile visibility 4. Select an option 5. Click Submit	Update Profile visibility: Upwork user only	Show a message Training or workshop have been added successfully	As expected,	Pass
Post Condition: N/A				

The screenshot displays the Selenium IDE interface for a project named 'Upwork Testing *'. The 'Tests' pane on the left lists several test steps, with 'Update Profile visibility*' selected. The main pane shows a table of test steps with columns for Command, Target, and Value.

Command	Target	Value
run script	window.scrollTo(0,300)	
run script	window.scrollTo(0,500)	
click	css=p-xl-0 path	
click	css=div:nth-child(2) > label .up-checkb	
click	ox-replacement-helper	
click	xpath=//div/div/div[3]/div/button[2]	

Below the table, there are input fields for Command, Target, Value, and Description. The bottom pane shows a log of test execution steps, all of which are marked as 'OK'.

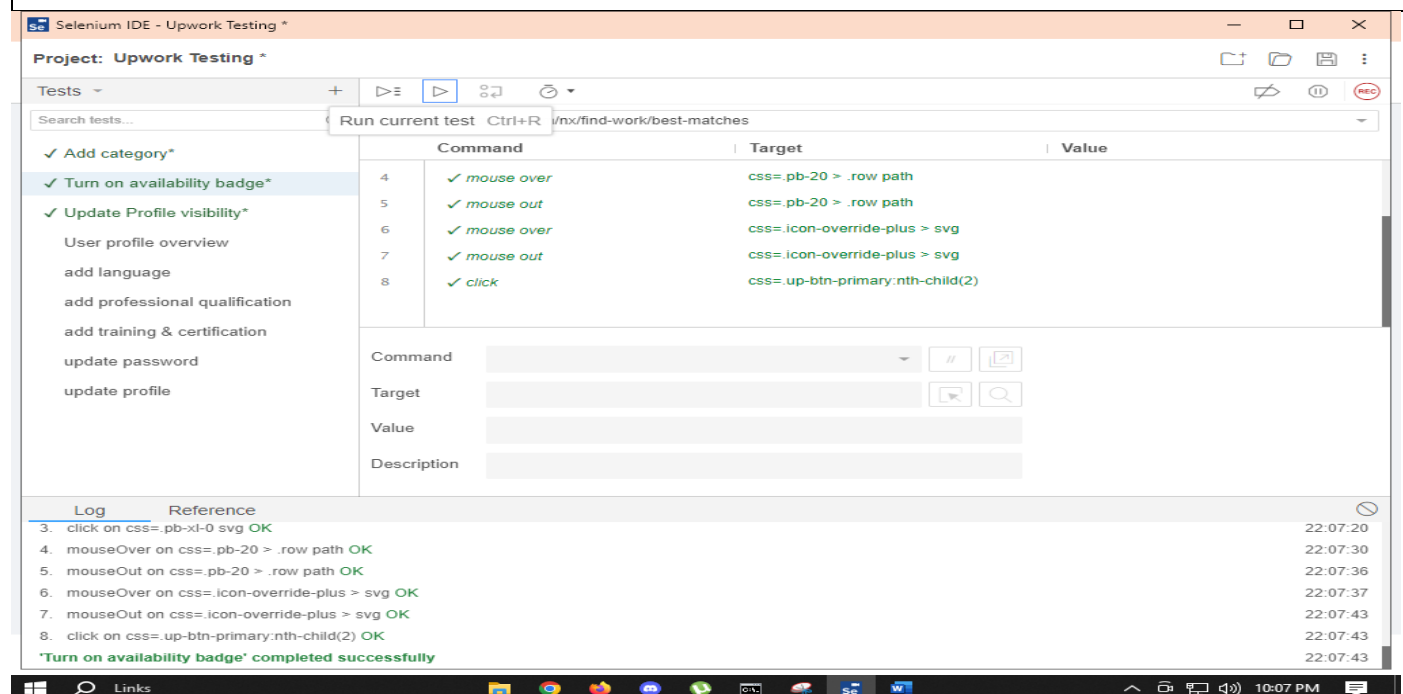

Log:

- 2. setWindowSize on 1040x754 OK 22:02:15
- 3. runScript on window.scrollTo(0,300) OK 22:02:15
- 4. runScript on window.scrollTo(0,500) OK 22:02:44
- 5. click on css=p-xl-0 path OK 22:02:45
- 6. Trying to find css=div:nth-child(2) > label .up-checkb-replacement-helper... OK 22:02:46
- 7. click on xpath=//div/div/div[3]/div/button[2] OK 22:02:46

The final status is: 'Update Profile visibility' completed successfully 22:02:46.

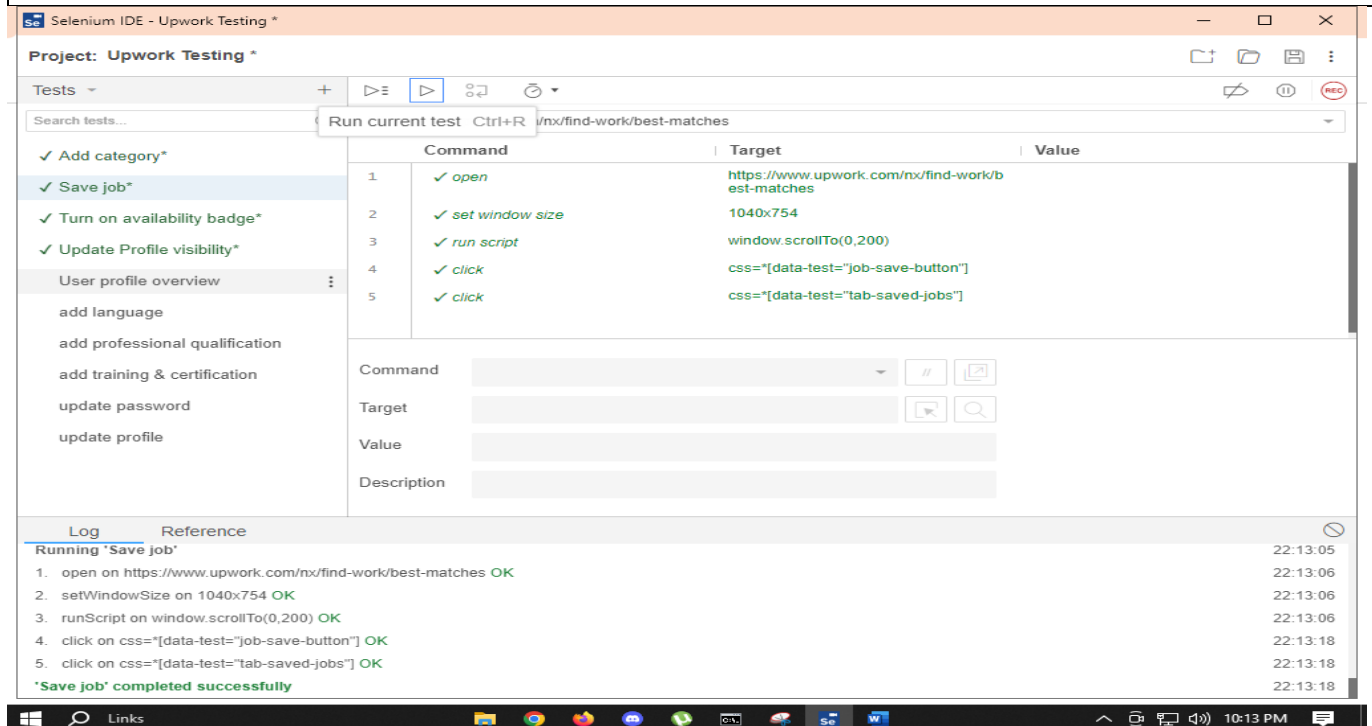

18. Turn on availability badge

32. See My requests

Project Name: Upwork			Test Designed by: Ovi Mohammad Golam Faruk	
Test Case ID: UPW_TC-32			Test Designed date: 26/08/2023	
Test Priority (Low, Medium, High): high			Test Executed by: Ovi Mohammad Golam Faruk	
Module Name: See My requests			Test Execution date: 26/08/2023	
Test Title: See My requests				
Description: Test My requests page				
Precondition (If any): Login in the website with valid email and password				
Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)
1. Go to the homepage. 2. Click on help button 3. Click on my request 4. Click on a request.		Shows the request title, status of the request	As expected,	Passed
Post Condition: N/A				

Selenium IDE - upwork-test

Project: upwork-test

Executing -

Run current test Ctrl+R

Command	Target	Value
1 ✓ open	nvclient/dashboard/	
2 ✓ set window size	1936x1048	
3 ✓ click	css= nav-dropdown.rtb-child(3) nav-item-label svg	
4 ✓ click	linkText=My Requests	
5 ✓ mouse over	linkText=Upwork Identity Verification Request	
6 ✓ click	linkText=Upwork Identity Verification Request	

Runs: 1 Failures: 0

Log Reference

4. click on linkText=My Requests OK 02:23:42

5. mouseOver on linkText=Upwork Identity Verification Request OK 02:23:43

6. click on linkText=Upwork Identity Verification Request OK 02:23:46

7. Trying to find linkText=Upwork Identity Verification Request. **Failed** 02:23:47

Playback aborted

'see requests' was aborted 02:23:59

Running 'see requests'

1. open on nvclient/dashboard/ OK 02:24:03

2. setWindowSize on 1936x1048 OK 02:24:04

3. click on css= nav-dropdown.rtb-child(3) nav-item-label svg OK 02:24:04

4. click on linkText=My Requests OK 02:24:06

5. mouseOver on linkText=Upwork Identity Verification Request OK 02:24:07

6. click on linkText=Upwork Identity Verification Request OK 02:24:10

'see requests' completed successfully 02:24:11

8. ITEM PASS/FAIL CRITERIA

In our project assessment, a significant portion of the test cases, approximately 85%, successfully passed the evaluation, demonstrating the robustness of the system. However, around 15% of the test cases encountered failures, which highlighted areas that require attention and improvement. Throughout the examination of a total of 32 test cases, a total of 5 defects were detected. Among these, 4 defects were categorized as high-priority, signifying their urgency for resolution. Additionally, 1 defect was classified as medium-priority, which also requires prompt attention. This indicates that the project doesn't have serious problems. But it's a good idea to carefully check and fix these issues before finishing the project for launch. Many of these problems seem to be related to mistakes in the logic or code. However, looking into these test cases in more detail is not part of the current test plan. In the future, working with the development team will be important to solve these problems. This might mean doing more tests to make sure the project is reliable and high-quality.

9. TESTING SCHEDULE

The project plan consists of a series of testing tasks, detailed as follows. The timetable in the project plan offers specific information about when each task will occur and how long it will take. Moreover, the project schedule and plan also specify the personnel needed for each step, which is essential for assessment purposes.

Task	16/08/23	17/08/23	20/08/23	23/08/23	24/08/23	25/08/23	26/08/23

10. Conclusion –

In summary, this project aimed to make the upwork.com website work better and provide a better experience for users. We tested the website thoroughly to check its features and quality, like how it works and how fast it is. We used a tool called Selenium IDE Chrome extension to help us test and measure its speed and performance. To decide if the project was successful, we had certain rules to follow. We needed to finish all the tests, get feedback from the main person in charge, fix important issues, complete a certain percentage of tests, and get approval from our team leaders. By following these rules, we can confidently decide when to improve and release the website, making it better for people who use upwork.com.
